Colorado
Idaho
United States Patent and Trademark
Office

COURT ADMISSIONS

U.S. District Court for the District of Idaho
U.S. District Court for the District of
Colorado

He brings over 15 years of experience drafting and prosecuting patent applications both domestically and internationally for patent owners within a variety of technical fields, including electrical hardware, software, wireless telecommunications, and semiconductor technologies. Matt helps lead and mentor a large team of patent attorneys, patent agents, engineers, and other professionals to deliver high-quality patent services in a consistent, timely, and cost-effective manner. He regularly writes, speaks, and provides media commentary on a range of IP and technology topics.

In addition to his prosecution practice, Matt has also represented clients in high-stakes patent litigation matters, including litigating multiple wireless telecommunications-related patents, many of which were declared essential to and/or asserted against 3GPP standards (GSM, UMTS, and LTE). Matt's background as both a patent litigator and patent prosecutor has provided him with a holistic view of the patent landscape and informs his approach to preparation and prosecution and other services.

Prior to joining Holland & Hart, Matt practiced as a litigator out of the Denver office of the international law firm of Gibson, Dunn & Crutcher LLP and as a patent agent with Fenwick & West LLP in Silicon Valley. He also worked as an electrical engineer for the U.S. Department of Energy at Sandia National Laboratories and as a graduate researcher in the Wireless Sensing Lab at the University of Washington.

EXPERIENCE

Patent Preparation and Prosecution

- Patent portfolio development and management
- Domestic and international patent preparation and prosecution
- Standards-related patents

Opinions and Counseling

- Patent infringement and validity analysis
- Non-infringement/invalidity opinions
- Product design counseling

Pre-litigation and Litigation Strategies

- Pre-litigation strategies
- Inter Partes Review (IPR) Proceedings
- Post-Grant Review (PGR) Proceedings
- Patent litigation and representation in Federal District Court

TECHNOLOGIES

Electrical hardware, software, wireless telecommunications, semiconductors, data backup and recovery, blockchain, artificial intelligence and machine learning, computer networks, power electronics, analog circuitry, alternative energy harvesting and conversion, photovoltaics
